GETTING THE TRUCK THAT YOU WANT IS SIMPLE.

Cleveland Brothers Full Truck Service is your Total Glider Kit Solutions Provider

If you've ever wanted a truck tailored to your needs but didn't want to deal with the hassle of finding all of the parts, getting quotes, and building an engine, now is your chance to have it hassle-free.

With your guidance, Cleveland Brothers can take care of the whole project and you'll only receive one quote!

This includes:

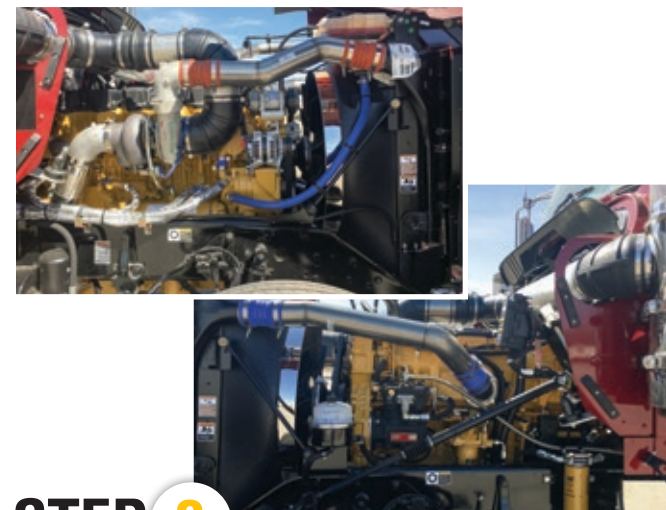

- Sourcing all of the components, such as wiring harnesses, fluid reservoirs, and tubing
- A complete engine, fan to flywheel, backed by the best coverage in the industry
- Coordinating body installation with a local manufacturer of your choice for dumps, mixers, water tanks, and more
- An assembled, turn-key truck, built from experience

STEP 1 Choose Your Favorite Chassis Model

Order the brand and style of chassis you want. Cleveland Brothers will connect you with experienced manufacturer representatives from Peterbilt, Freightliner and Kenworth to make ordering easy.

Your chassis can be delivered directly to one of 13 Cleveland Brothers full truck service locations to make assembly quick and uncomplicated.

STEP 2 Pick a Powerplant

With Cleveland Brothers glider kit service, you can choose the engine you want and eliminate unwanted maintenance costs.

Select from Cleveland Brothers In-House Rebuild Engines with a 4-year unlimited mileage warranty or a Cat® Reman Engine.

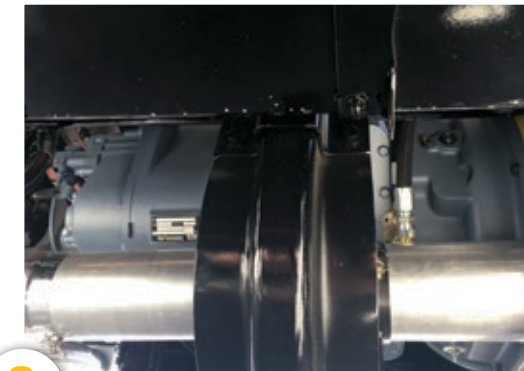

STEP 4 Choose Your Accessories

Under your hood, you can expect a clean engine bay with hose and wire tucking, and easy-to-access grease points and filter.

You can choose to stay true to OEM if you just need your engine to work hard or show it off by adding stainless steel, polished aluminum or custom-painted tubing.

A standard full 5" turbo back exhaust is included to optimize performance over some OEM's 4" exhaust.

STEP 3 Select an Automatic or Manual Transmission

Whether it's an Eaton or Allison transmission, Cleveland Brothers can help you determine the best option for your powertrain.

Couple your transmission to a custom fabricated, balanced, and smoothed driveshaft to put the horsepower to the road.

STEP 5 Assembly

Skilled Cleveland Brothers technicians will take your individual components and assemble your truck the way you want it. You can rest assured knowing you'll receive a complete truck that was constructed with the quality craftsmanship that only Cleveland Brothers can deliver.
